

Welcome to the New York State Dominion Newsletter!

In an effort to maintain strong communication with our valued New York State customers we have created this bi-monthly Newsletter.

Our first edition is to alert you of important General Election reminders and updates. In addition we are requesting your assistance in making the Newsletter an important

communication tool between Dominion Voting Systems and the New York Counties.

If a county or Region has subjects, important ideas or comments that they would like printed in our upcoming editions please submit these points of interest in writing to your County/Region CSM. We are scheduling to issue the Newsletter the 1st & 3rd Monday of the month. So please submit those important subjects on the Monday of the 2nd & 4th weeks! We value your input and we

greatly appreciate everyone's help in making the Newsletter an important

**ImageCast
BMD**

communication tool for New York State.

Current ImageCast and EMS Versions

ICP Firmware	1.30.5
O/S	4.0.8
Loader	1.12.1
BMD Firmware	2.22
EMS	3.0.3455

Firmware versions can be verified by accessing the Election Statistics on the Administration Screen – 2nd

Important Reminders

- Contact your CSM to request Support
- Submit all repair & possible RMA issues to your CSM
- General Election Programming Supplies – Please remove all Labels prior to shipping the cards & iButtons to Phoenix Graphics or Fort Orange Press!

General Election Programming – DCF File

Some of the ImageCast functionality is controlled by the Device Configuration File settings. Some of these settings are fixed based on certification requirements and Dominion has recently submitted changes to 2 of these settings so that they may be edited during Election Definition and Programming.

- 1) Under Vote Warning
- 2) Audio Validation (audio validation disabled will reduce the BMD election file boot up time)

Day Light Savings Time – The Day Light Savings time setting will be automatically corrected by the DCF when you load your General Election files. DO NOT manually set the Date prior to the General Election! The time on the ImageCast prior to November 1st will appear one hour behind, but will automatically reset as of November 1st.

Those counties programming their own election are reminded to request the new DCF file from the SBOE.

Exception to the Rule: Nassau County – The Day Light Savings settings were completed during recent tech repairs.
