mounted on the cover of the unit
- The electronic key is secure and resistant to duplication
- Provides access control to the unit
- Authenticates the software version, ensuring it is a certified version that
  has not been tampered with)
- Decrypt election files at the beginning of the election
- Encrypt results files at the end of the election
- Unique password linked to the key whenever is used by the administrator
- Contains two encryption values to provide security for all election files

### Voter response keys
- Two Hardware function keys: 'Cast' and 'Return', are used directly by the
  voters
- When the button is active, it is illuminated and the LCD displays the
  appropriate message

### Removable Memories
- The Insight - Image CAST has two removable, non-volatile Compact Flash
  sockets (Primary and Administration)
- Access to the memory cards from the front of the unit
- The Administration Memory Card is a complete copy of the primary card
- They contain the entire set of data files supporting the election
- Used as redundant memory devices in case of data processor, central
  processor, or single memory unit failure.
- Allows recovery from any condition causing the equipment to become
  inoperable
- In case of catastrophic electrical or mechanical damage, the memory
  cards are inserted into a spare unit, so the unit resumes operation using
  the previously stored election data when powered on

### Audio Tactile Interface (ATI)
- Hand-held device used by the voter during an Audiovote selection to
  navigate through and make selections to their ballot
- Raised buttons of different shapes and colors with large or brailed
  numbers and letters
- Can be operated with one hand
- Includes a 3.5 mm headphone jack
- Uses light pressure switches
- The ATI is tethered to the Insight - Image CAST unit and can extend 15
  feet from the unit

### Voters with poor vision
- Magnifying device (magnifying sheet) that can be used to enhance items
  on the ballot that need to be read

### Built-In Audit Functionality
- Diagnostics Report: record of each test performed by the user
- Zero Report: report showing no ballots have been cast in the election
- Interrupt Report: in the case the unit function is affected, the device is
  returned to the same operation condition prior to error; it shows the
  number of processed ballots without loss or corruption of data
- Results Report: Generated when the polls are closed, contains the
  election totals as well as the information about the election
- Statistics Report: contains a printed record of all overvotes, undervotes,
  blank ballot, invalid ballot, misread paper errors, etc.
- Any report can be printed several times

### Audit Log File
- Every action, event and operation that occurs on the unit is permanently
  logged to an audit log file that exists on both memory cards
- Each ballot scanned, interpreted and accepted into the Insight - Image
